DECISION ON INTERNATIONAL EXCHANGE REQUIREMENT IN THE MIMM PROGRAMME

In order to improve flexibility of studies international exchange period is no longer required as prerequisite entrance criteria for the internal applicants (LBM B.Sc. students) to the MIMM programme. However, international experience is a condition for graduation from the MIMM programme.

The required international experience can be gained either during bachelor or master's level studies, and included in either of the degrees. The international experience can be gained from 1) exchange studies abroad (min. 20 ECTS), 2) a combination of international exchange studies and traineeship (min. 20 ECTS of which traineeship max. 6 ECTS) or 3) by successfully completing a double-degree study programme in one of the double-degree partner universities of the MIMM programme. This decision is valid as of March 7, 2019.
